

JUMP START KinderKeys PIANO LESSONS

For 4 - 6 year olds!

The Fast Track Way to Learn to Read Music

Developed by Certified, Degreed Music Teacher, Theresa Villec

By the end of the week, students are able to play songs like Jingle Bells and Mary Had A Little Lamb. They are reading the music in the form of note durations and music letters applied to the piano/keyboard.

In my weekly private and group piano course, the KinderKeys kids are at this skill level by about the end of 5 month of lessons: about 20 weeks. Not bad really...considering I see them only once a week for between 30 and 45 minutes. As long as they practice the rest of the week, they're able to achieve the understanding and skill of reading music and apply it to an instrument. From here, they continue in their musical journey as they are becoming a Music Maker...for life!

In this concentrated 1 week "camp", students learn their lesson and then are able to practice during the sessions. They have headphones during practice sessions so that I can work individually with students. We also play music games to reinforce the lessons. Then they get music money that they can spend at the music store. Finally, we spend a portion of the time singing, dancing, and playing percussion instruments and the guitar and drums. It's all for fun...and learning!

The classes are Monday - Friday from 1:00 pm - 2:00 pm. Recommended ages are 4 - 6. Results are based on age and ability. But they will ALL be able to read and play music by the end of the week! On the last day each student can perform their best piece for friends and family at the class site. **Cost is \$125.00. Family discounts available: 2 students get 5% off; 3 or more students get 10% off! (Not applicable with a special deal)**

Cost Comparison: compare with 20 lessons at \$22 each: \$440 (savings of \$315)

(Upon completion of the class: Student is entitled to one free KinderKeys class lesson in first month of weekly KinderKeys class.

Another \$22.00 of savings.)

Enthusiasm Comparison: No comparison! The goal is to get the students reading asap so that they can start to play something which becomes a reward itself, and....motivation for future practicing!

Have an older student interested in learning to play the piano? See our link for the Jumpstart Piano classes in the mornings!
